

MEMORANDUM

Date : 30 July 2025

To : RSOC, DSOs/LEXGLIMOSes and deputies, DTOs, Users' Office

Cc : Claudia AHDIDA (HSE-RP-AS, Radiation Protection Physicist and RSO),
Pierre CARBONEZ (HSE-RP-DC, Section Leader)

From : Julie BIRINGER (HSE-TS-ST, Section Leader)

Via : Angela GOEHRING-CRINON (HSE-TS, Group Leader)

Subject : New Safety Training course "Radiation Safety – DIMR/WDP – Application"

A new in-person training course entitled "Radiation Safety – DIMR/WDP – Application" is now available on CERN's Learning Hub, in the [Safety/Radiation Protection \(RP\)](#) catalogue.

Developed by the Radiation Safety Officers Committee (RSOC), this course provides advanced, hands-on training for Members of Personnel involved in planning and optimising complex interventions in classified radiological areas using the DIMR/WDP tool. It is built around practical use cases reflecting typical intervention scenarios at CERN.

This course is recommended for the personnel responsible for planning interventions in classified areas or holding related supervisory roles, including DIMR owners, Safety Link Persons (SLP) appointed in experiments and Works and Services Supervisors (WSS).

Please note that the modules covered in this course are already included in the "RPE/RSSO – CERN Specifics" training. Therefore, RPEs and RSSOs do not need to attend this course separately.

Sessions will be scheduled on an ad-hoc basis, depending on waitlist enrolments, in coordination with the RSOC.

For any questions or assistance about the course, please contact safety-training@cern.ch.
